THE BUHLMANN GROUP

Your specialist for premium steel products

At a glance: company overview, industries served,
products, and competencies

Groundbreaking and innovative

WE KNOW HOW.

From Bremen to all around the world

The BUHLMANN Group is an international trading house for steel pipes, tubes, fittings, and accessories. The highest product quality standards and global customer service are among the Group's core competencies. The range in stock, which weighs more than 65,000 tonnes, is spread over twelve warehouse locations with a total area of more than 136,000 square metres.

Since its foundation in Bremen, Germany, in 1945, the company has constantly grown. It now employs 750 people all over the world. At the same time, the BUHLMANN Group not only relies on its own expertise, but also continues to develop consistently together with its subsidiaries. In addition to the large warehouse locations in Duisburg and Dordrecht (Netherlands), there are numerous other offices and warehouses in Europe,

America and Asia. The subsidiaries BUHLMANN Industrie Technik GmbH, BARTHEL Kesselrohre Boilertubes GmbH, Technisch Handelsbureau De Hellebeuk B.V., R-S Matco LLC and Lockwood Partners LLC also belong to the Group.

Full-service solutions from a single source

The BUHLMANN Group is a full-service provider and consultant and a reliable partner for all its customers. We offer comprehensive project management, from planning and goods logistics to the coordination of technical support for all partners involved on the customer and manufacturer side. Companies from the energy, petrochemical, chemical, oil and gas industries, as well as shipbuilding and mechanical engineering sectors place their trust in us.

- Worldwide material procurement in compliance with international guidelines
- Approval procedures for new suppliers in accordance with internal guidelines and in cooperation with large companies
- Supply chain procurement for bulk purchasers
- Materials testing
- Material testing in cooperation with approved organizations
- Certification and approvals in accordance with international standards and guidelines

EVERYTHING
FOR YOUR NEEDS

OUR PRODUCT VARIETY AT A GLANCE

Full-service solutions

All steel pipes and fittings are available in standard and non-standard wall thicknesses as well as in seamless and welded versions in all materials: DIN/EN pipes, ASTM/ASME/API pipes, DIN/EN fittings, ASTM/ASME fittings, ASTM/ASME high-pressure fittings and valves. For flanges, the range in stock includes almost all standardised versions in the common pressure ratings, sealing surfaces and materials in accordance with DIN/EN, ASTM/ASME/API.

Our Non-Ferrous team also offers you products made of copper, brass, CuNi, aluminium and steel. If you are interested in nickel-based materials in any form, the Special Materials Competence Center is at your service. The BUHLMANN Group also offers various extras, such as special fittings based on drawings or pipes made of round steel. In addition, sawing, chamfering, boring, turning and special machining are also common extras that are available on request.

- Certificates:
ISO 9001 (quality management)
ISO 14001 (environmental protection)
ISO 45001 (occupational safety and health)

YOUR ADVANTAGE: OUR SERVICE

Comprehensive and global

Modern and efficient, whether digital or in stock

Exclusive webshop: Conveniently order products online and don't spend ages searching. The products and specifications are individually tailored to your needs and you have an overview of the current stock at all times. Over 40,000 items are available and stock availability is completely transparent. Thanks to direct interfaces and shorter distances, we offer a more efficient process flow and guarantee faster delivery.

Live tracking: Thanks to specific assignment with a consignment number, you can track your goods from the moment they are dispatched – regardless of whether they are large or small consignments. In the customer portal you have access to invoices, delivery notes and certificates.

BUHLMANN Port: Our digital showroom offers comprehensive information about our company. Here, you can make appointments and take part in meetings. The career section provides insights into BUHLMANN as an employer. The webinar area is a highlight, where exciting topics are discussed by our experts in person.

Premium testing: We offer additional tests according to your needs. If desired, for the whole order. Our specialized staff ensures high quality testing and visual inspections. Digital measuring is done with state-of-the-art equipment. Subsequently, you will receive professional and individually tailored documentation and measurement reports.

Automated small parts warehouse (AKL): In Duisburg, independent robots manage over 50,000 boxes with small parts. Goods are stored in or picked from the system at three picking stations. Up to 4,000 movements a day ensure significantly faster lead times throughout the process. As a result, products are delivered within 24 hours throughout Germany and within 48 hours throughout Europe.

Automated pipe warehouse (ARL): Our ARL in Duisburg ensures much faster order picking. Unalloyed, alloyed and stainless steel pipes up to seven metres long and up to 168 millimetres in diameter are stored in 2,360 cassettes. Additional services such as sawing, colour marking, special packaging and encapsulation enhance the service around the ARL.

Our service partners

Logistics – Brinker Fetten Logistik GmbH & Co. KG: Our long-standing and trusted logistics partner ensures that your goods reach you quickly and safely. All vehicles are specially equipped for pipe transport, among other things with additional stanchions. Special consignments are also possible. For more information, visit www.brinker-fetten.com

Material testing – MT Laboratories GmbH: Additional material tests and acceptance tests, such as tensile and hot tensile tests, notch impact tests, hardness tests, technological tests and more, can be carried out with our long-standing partner in Duisburg. All material tests can be certified by MT Laboratories GmbH or, on request, by all other acceptance and classification companies. MT Laboratories is DIN EN ISO/IEC 17025 accredited. For more information, visit www.mt-labs.de

Machining centre – NRG Special Products B.V.: Our in-house service provider NRG Special Products B.V. offers professional services for mechanical production at the Dutch site in Dordrecht. In addition to flange connections, other individual forged parts can be produced there. NRG Special Products B.V. offers an even more precise and

effective process using various CNC lathes and a CNC milling machines.

Processing – Surfektion GmbH: The Duisburg-based company combines the surface treatment of pipes and metal parts as well as their storage and transport. Surfektion has ultra-modern blasting systems that carry out all surface treatments of pipes and metal parts using the very latest technology. In addition to the blasting itself, this also includes all coating work. For more information, visit www.surfektion.de

Special parts production – Unicorn GmbH: Unicorn manufactures standard or special components for plant and pipeline construction. A specially equipped machine area offers the possibility to produce components, but also to adapt existing pipe components to individual needs. For more information, visit www.utp.gmbh
